

"Environmental protection is everybody's business!"

As a company we see this slogan as a commitment to future generations.

We have been convinced for a long time that investing in environmental protection is both necessary and meaningful and can help strengthen our economic position. Responsibility for our planet as a basis of life for generations to come requires us to reflect upon the effects of our daily activities. This fundamental thought is an integral part of our company targets and forms the basis of our environmental policy:

1. Through continuous improvement we expand and enhance our operational environmental protection policy.
2. We actively promote environmental protection and safety by training and sensitizing our employees.
3. We consider environmental effects resulting from the development of new processes.
4. We cultivate the economical use of natural resources.
5. We minimize emissions and waste.
